# AGM SEMINAR EVENING

## 21 AUGUST 2009

*"Wellness is a lifelong process of assuming personal responsibility that empowers the individual to exercise choice, make informed decisions and take action towards a more balanced, dynamically sustainable and fulfilling existence in all dimensions of life"*

*Proudly sponsored by **MEDFIN***

### **VACCINES—10,000 shots for our children with speaker Meryl Dorey**

Meryl Dorey is President of the Australian Vaccination Network, a national volunteer-run health support and lobby group which has been in existence since 1994. She is also the Editor of Living Wisdom magazine, a publication dedicated to the idea that health choices must be informed choices and that in order to be healthy, we need to consciously care for our children, our bodies and our world. The AVN was instrumental in bringing about legislation ensuring that parents can be conscientious objectors to vaccination and not lose any government entitlements and are vehemently opposed to the current push by the Australian government and mainstream medicine which would mandate the use of vaccines.

Ms Dorey will talk about Dr Paul Offit, co-holder of the patent on the current Rotavirus vaccine (a patent which he recently sold for over US \$29 million) and a member of the CDC's Advisory Committee on Immunisation Practices which licenses and approves vaccines in the US, whom has published a study which claims that children can receive 10,000 vaccines at one time without any ill effects. The current Australian Childhood vaccination schedule contains upwards of 50 doses of vaccines by the time a child starts school and plans are under way for a vaccine that contains antigens to over 100 diseases to be administered at birth. How much is too much?

Where is the proof that vaccines work or that they are safe? Before we allow the unbridled use of 10,000 vaccines on our children or ourselves, it is time to take a step back and examine the scientific evidence regarding vaccination's effects on our immune systems and on the incidence and mortality from infectious diseases.

As chiropractors, many of our patients look to us for access to information on vaccination choices that they may not receive from their other health professionals. Be empowered and armed with knowledge about this important issue of informed choice from a leader in the field.

**Venue:** Holiday Inn Adelaide, 65 Hindley Street Adelaide

**Date:** **Friday, 21 August 2009**

**Time :** approx 8.30pm—following AGM
